MELAYA | odoo

Odoo Learning Partner

AI agents that work inside Odoo

Ask, run and approve, right from the record.

AI agents that do real work, with a human in charge

Build: drag agents and tools into a pipeline.

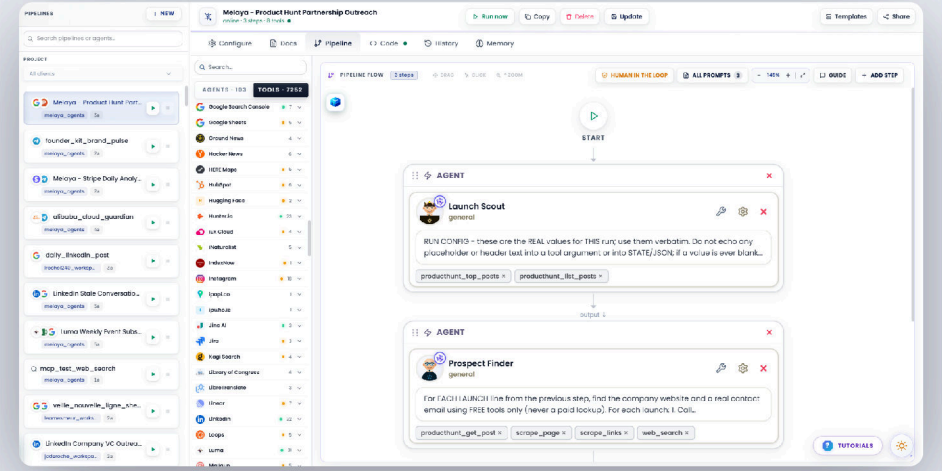

Ask: chat with an assistant that knows your business data.

Control: approve, replay and score every action.

Melaya speaks Odoo

187
Odoo actions (51 read, 136 write)

19 · 20
Odoo 19 and 20, Community and Enterprise

JSON-2
Odoo's own API, no screen scraping

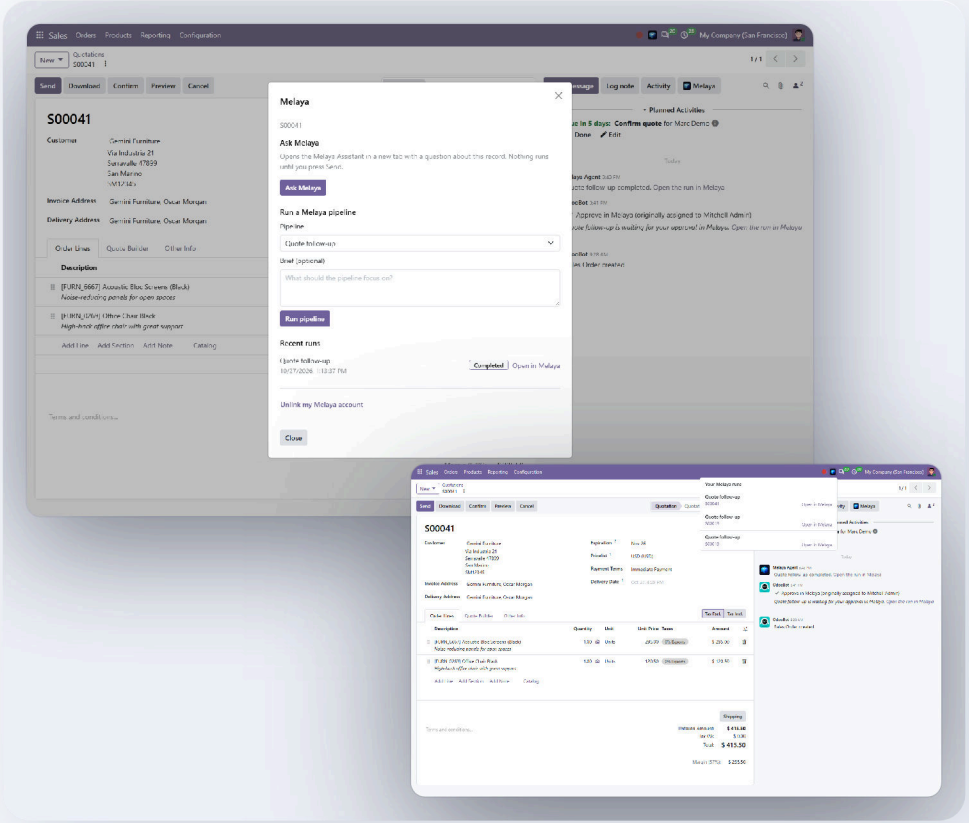

Odoo permissions stay in charge

CRM · Sales · Invoicing · Purchase · Inventory · Manufacturing · Project · Timesheets · Helpdesk · Employees · Time Off · Expenses · Recruitment · Documents · Knowledge · Website · Events

Click. Pick. Approve. Done.

1. Open a quotation and click **Melaya** in the chatter.
2. Pick an agent, like **Stalled Quote Rescue**. Add a note if you want.
3. The agents read the quote, the customer and their history.
4. You approve in Melaya. **Nothing changes before that.**
5. The result lands on the record as an internal note.

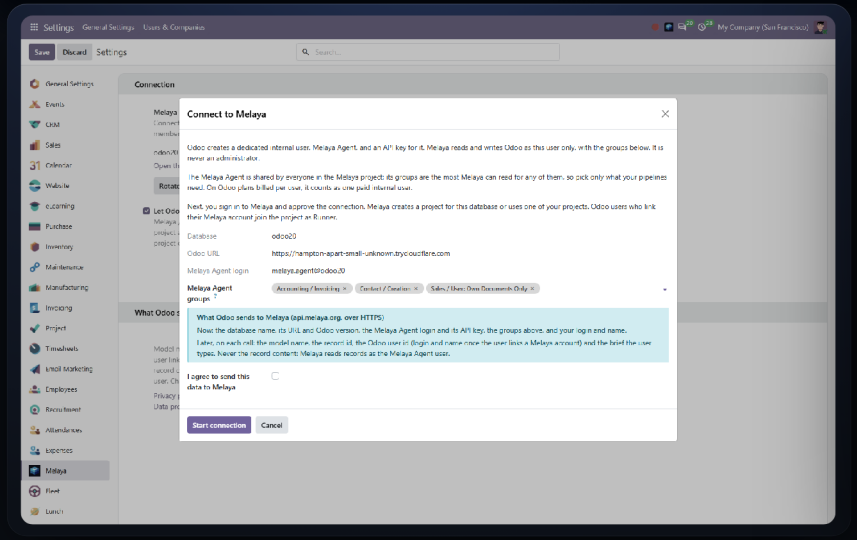

The Melaya window on a quotation · the "Approve in Melaya" To-Do and result note

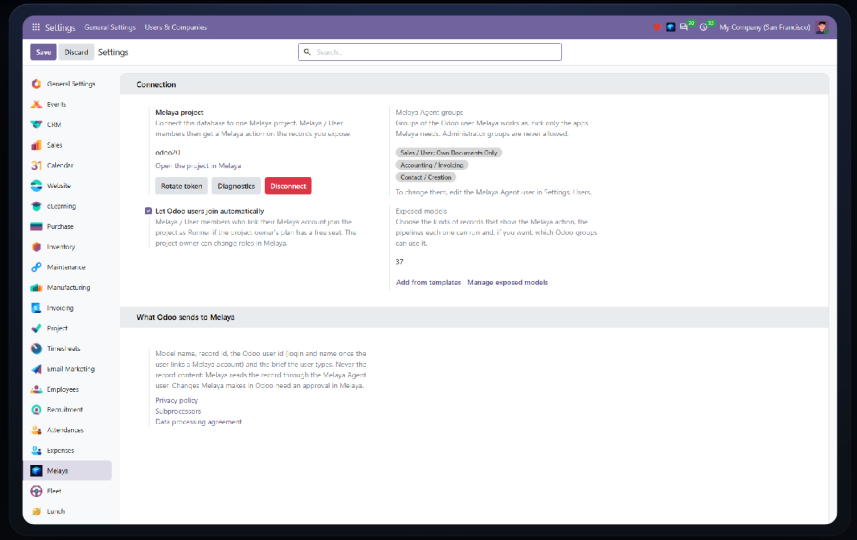

Install. Connect. Add agents.

A free Melaya account is enough to start.

1. **Install** Melaya AI Agents for Odoo from the Odoo Apps store. Free.
2. **Connect** in Settings > Melaya: review what Odoo sends, sign in, approve.
3. **Add from templates:** tick the agents the team needs.

Connect: review exactly what Odoo sends

Settings > Melaya, connected

72 ready-made agents. Pick, don't build.

Stalled Quote Rescue

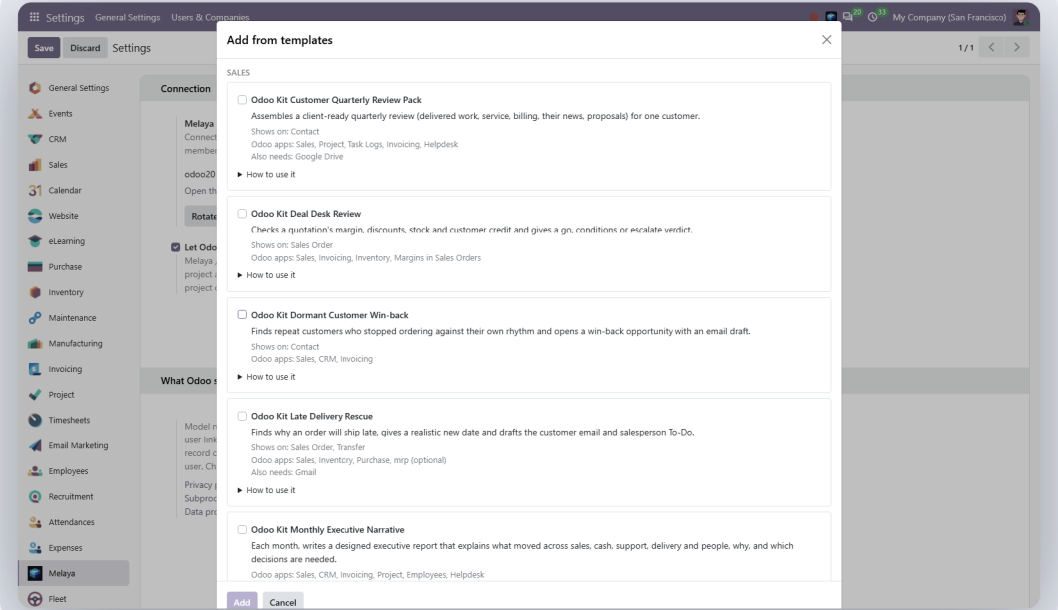

writes the personal follow-up for a quote that went quiet.

Vendor Bank Change Guard

flags risky vendor bank changes before anyone pays.

Daily Exceptions Brief

every morning, only what needs action today.

Tested on Odoo 20 Community and Enterprise.

Build a client's AI agent system by just asking

Melaya MCP server + Melaya skill, inside Claude or ChatGPT.

1 **Connect:** link Claude or ChatGPT to Melaya with one sign-in. The client chooses what it may do.

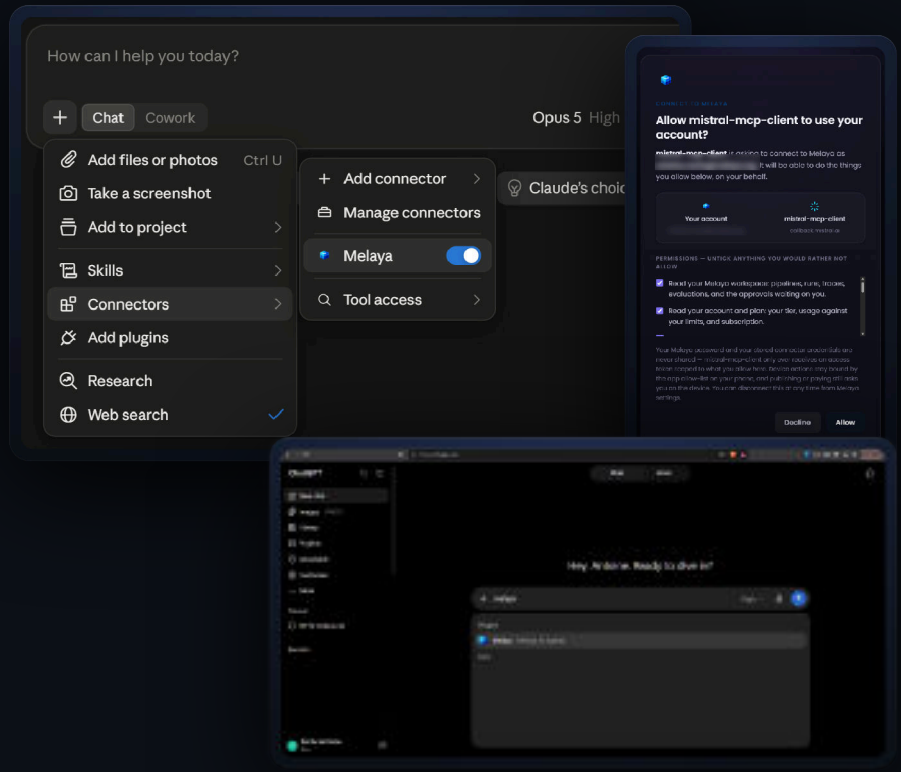

2 **Describe:** explain the client's process in plain words, e.g. "chase late Odoo deliveries and email the customer".

3 **Get a working system:** pipelines, connectors, schedules and approvals, built and tested in the client's Melaya project.

`OAuth 2.1 sign-in` `permissions per domain`

`approvals before sensitive actions` `every run logged and replayable`

130 Melaya tools over MCP · works in Claude, ChatGPT, Codex, Mistral and Cursor

RESULT LANDS IN

Pick the AI.
Switch any time.

51 AI providers

OpenAI, Anthropic, Google, Qwen, Mistral, Eden AI, local models and more.

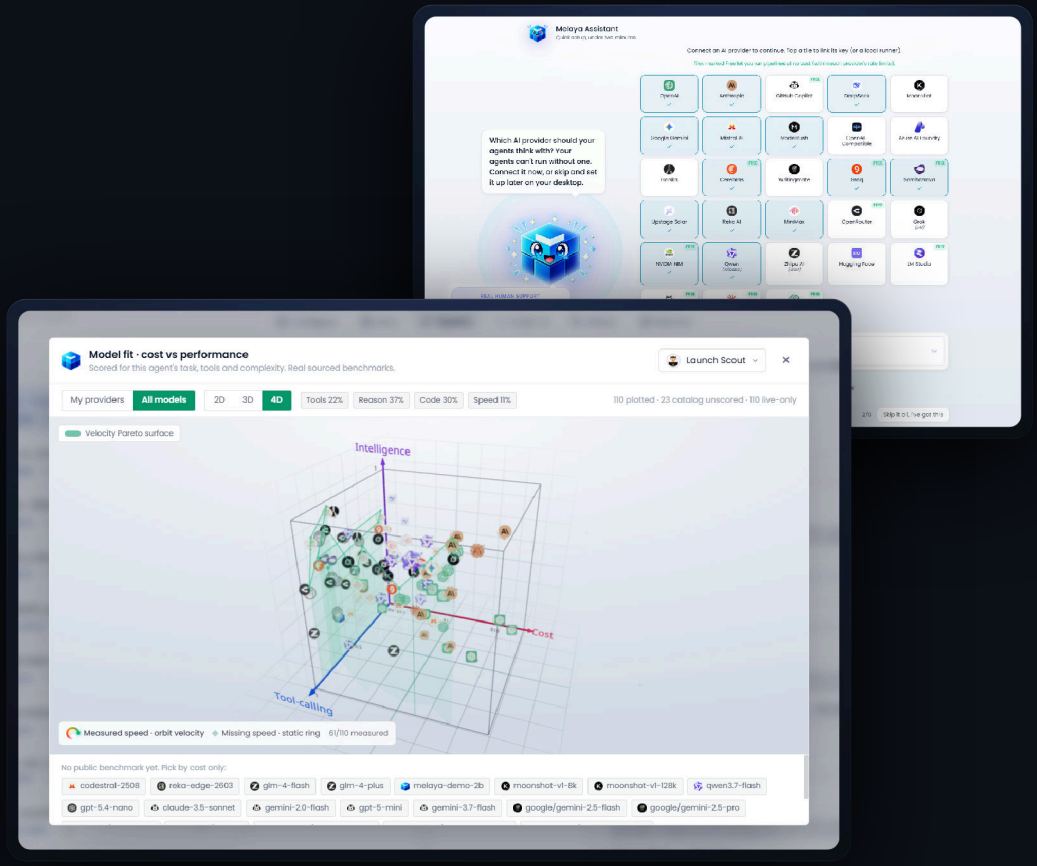

Bring your own key

no lock-in, you pay the provider directly.

A different model per agent

a cheap one for sorting, a strong one for writing.

Odoo templates start on Qwen 3.7 Plus.

You choose where the AI runs

MORE PRIVATE

1. **On your own computer:** Ollama or LM Studio through the Melaya runner. Model calls stay on the machine.
2. **On your own server:** your company's model server. Melaya calls your address.
3. **Privacy-first providers:** Eden AI (EU gateway), Scaleway (EU-hosted), Munito (zero data retention).
4. **Frontier clouds with your own key:** OpenAI, Anthropic, Google, Qwen, under the terms you sign with them.

Melaya does not train AI models on your customers' data.

Safe by design

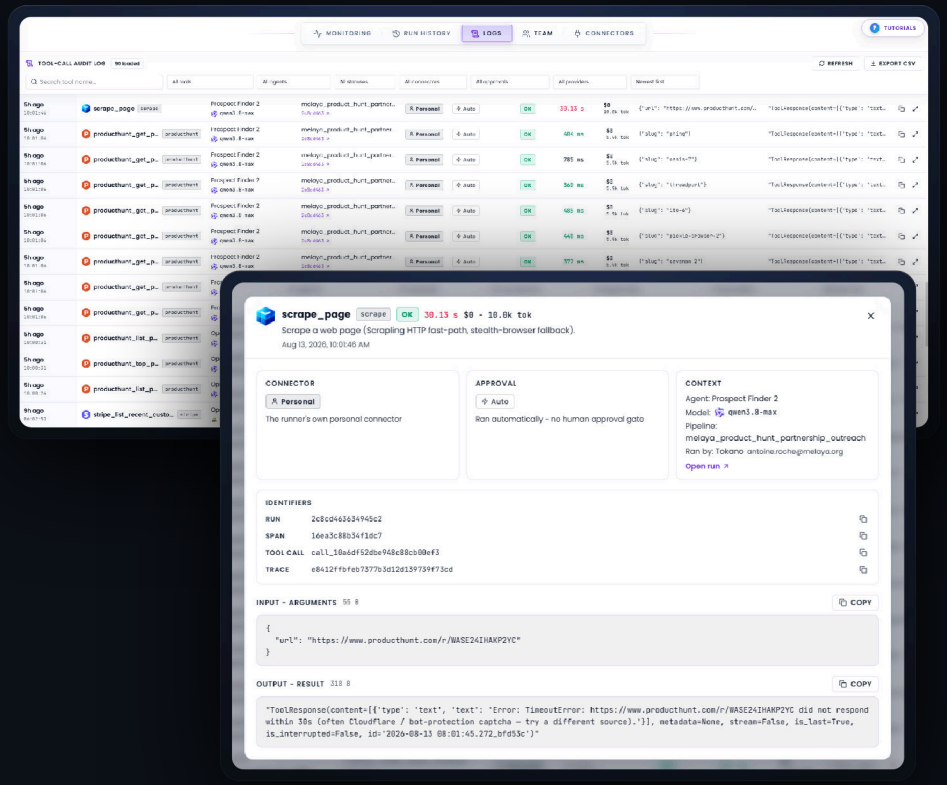

Odoo never sends record content. Melaya reads as the Melaya Agent, with the groups you chose.

Every change waits for a person to approve it.

Every action is logged and replayable.

Keys are encrypted, and each customer's data is walled off.

Disconnect = everything revoked.

Bring Melaya to your Odoo customers

FOR YOUR CUSTOMERS

a ready AI layer on the Odoo they already use.

FOR YOU

a new service line, plus 30% recurring commission for the customer's lifetime.

01 **30-day attribution**

02 **Monthly payouts**

03 **Or share the value:** 20% for you + 10% off for them, or 10% + 20% off
